Election/Restrictions

- Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4 and 9-11, drawn to classification, classified in class 382, subclass 224.
 - II. Claims 5-7, drawn to, wherein setting a threshold, classified in class 382, subclass 172.
 - III. Claim 8, drawn to comparator, classified in class 382, subclass 218.
- The inventions are distinct, each from the other because of the following reasons:
- Inventions I, II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because pixel classification does not require determining a threshold. The subcombination has separate utility such as comparing an intensity for each pixel.

- Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
- Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
